It is amusing to read the Abolition organ at Washington accusing the National Intelligencer of treason. The editor of the Republican thinks if Jeff. Davis should get to Washington his paper alone would be suppressed; that Davis would be a good friend to the Intelligencer. Our opinion is, that Jeff. would do a good thing if he suppressed the Republican; but along with the good, we apprehend Jeff. would do more evil than would compensate for that little good. The sin of the Intelligencer consists in its constant opposition to the emancipation of slaves, without which, the Republican thinks, the rebellion will never be put down. Now, why doesn't the Republican issue a proclamation emancipating all the editor has about as much power to accomplish the end as the Government of the United States, and as much law for its guide

These rebels stand between the Republican and the African servants, so that the Reand then they will not be in the way of the Republican's notions about negroes. Putting down the rebellion by emancipating slaves is equal to the stereotyped plan proposed to little boys to eatch birds since Adam was a lad-throw salt on their tails; and there is just about as much statesmanship and sense in it. And yet these crazy noodles assume to set themselves up as judges of patriotism by their asinine standard. According to them, whoever is not a simpleton is a traitor. Had it not been for such men as the editor of the Republican, the conspirators of the South would have failed to rally the force they have to their standard; and if Abraham Lincoln would suppress the Republican and all such treasonable and revolutionary sheets, and not leave it for Jeff. Davis to do, he would aid his cause more than he could by any war measure he could adopt.

It is suggested now that foreign powers will intervene, when informed of late rebel successes; but foreign powers are not so ready to put their fingers into the fire as some suppose. They have as much also; and just here I must tell the following interest in the good will of the Government as in that of the South at last. The South can do them no harm, except in withholding cotton, and King Cotton is played out. He is a poor King. His subjects are committing him to the flames to the best of their

There is a class of editors who amor for a vigorous policy, and when you in loud proclamations and barbarous practices. The Generals they admire never won a battle. They have uniformly failed in the field. Fremont, Hunter, Phelps,

Mitchel, and Pope, are their model Generals, because they have proclaimed slaves free, made empty threats of vengeance upon rebels, and allowed savage practices by their troops. All this is madness, and the result of conscious weakness and unmanly temper. Any incompetent commander can exercise such vigor; and the weakest enemy can retaliate for such conduct.

Gen. McClellan's Silence.

Gen. McClellan has won respect for his character from all thinking men by speech which has been silver, but more by silence which has been golden. Almost from "On to Richmond" days till now he has been the target of unscrupulous assault. Politi-cal hostility and personal malevolence have discharged all their weapons. His military abilities have been belittled by his enemies more than they have been overrated by his friends. The good use which he has made of the spade to counterbalance the enemy's odds in muskets only earned for him from them the epithet of Ditcher." Because he did not use as a hospital the White House, which was put to other and better service, he was accused of collusion with traitors. He long received and put at work all the negroes which came to his lines, yet was always accused of excluding them. His plans were thwarted by the intrigues of his enemies at Washington, yet he was made responsi-ble for the failures thus caused. THE AMERICAN WATCH COMPANY GIVE tice, that they have lately issued a new style of Watch, expressly designed for soldiers and others who lesire a good watch at a moderate price. Sewing Machine! WARRANTED THE BEST IN THE MARKET. Elias Howe, Jr., and S. H. Roper's Com-

THESE SEWING MACHINES COMBINE THE
most recent improvements, are nearly noiseless,
when in operation, run with the greatest ease and rapidity, and are better adapted for general purposes and
family use than any other. They are not liable to get
out of order, are exceedingly simple, and are made expressly for real practical utility; they do every variety
of sewing, from the finest woven tissue to the heaviest
woolen goods, both tailoring and fine leather work.
Any person may learn to operate them in a very short
time. time.

The great difficulty with all other old-style Machines is too much complication, requiring so much constant adjustment, and such an amount of mechanical skill and ingenuity to use them to advantage, as to render them of little comparative value.

But the Sewing Machines manufactured by Greenman & True are not liable to these objections, as any person, on even a moment's examination, will readily discover. They will do more and better work than any other Machine ever offered to the public, making the most beautiful lock-stitch, alike on both sides. Send for an off-hand specimen of sewing upon any material you wish, and you will then see How it is done.
